

TRAVEL TIPS

How to choose a good seat on the plane!

It is not really nice to be sitting near the toilet or in the middle of a row of three seats.

If you can choose your seat when you book your ticket, do it, do not wait until the last minute.

Unfortunately more and more companies charge an additional fee to book the best seats in advance, especially those located at the exits

However, there are other seats with plenty of leg space that can be found through the site.

www.seatguru.com

Must then indicate your destination and flight number.
